

Personal Financial Coaching

We are unlike Financial Advisors and Financial Planners. We don't sell investments, insurance, or other financial products. This leaves us free to be entirely objective with our advice. We have only your best interest in mind.

With personal financial coaching, you meet regularly with one of our experienced coaches. Our coaches work with you to develop a strategy that is specific to your unique situation.

We don't simply write a plan. We teach you how to use your money, talents and abilities, how to manage your money, how to work with creditors, how to plan, strategize, and how to organize your money. Our goal is not to do it for you, but to work with you and teach you through the whole process so that you can enjoy a lifetime of success.

Your investment with Vertical Vision is one of the BEST investments you will make because it will directly affect you for years to come. We can help you avoid bankruptcy, deal with creditors and lenders, move from normal to incredible and start to gain control of your money instead of your money controlling you.

What is a Coach?

"one who instructs or trains; especially one who instructs players in the fundamentals of a competitive sport or directs team strategy"

- Merriam-Webster Dictionary

What our clients are saying:

"When I started working with Vertical Vision, I wasn't sure how I was going to pay them or all of my bills. Almost immediately, I had spending money and all my bills were being paid early. Within a few months, the majority of my debts were paid off. Life has been much better, I'm so glad I started working with Gregg at Vertical Vision." - John S.
